SOFTWARE ENGINEERING PROFESSORSHIP

The Institute of Computer Science of University of Tartu cordially invites you to participate in the following forum:

Software Engineering Education in Estonia

To be held at Reval Hotel **Olympia**, Tallinn on Thursday **24 April** 4:00pm to 6:30pm followed by a dinner.

The aim of this forum is to reflect on the ongoing software engineering skills shortage in Estonia and to discuss ways in which industry and academia can engage together to address this challenge.

Questions to be addressed include:

- How pronounced is the skills shortage in the Estonian software industry?

- Are graduates from Estonian higher-education institutions coming out with the right mix of skills to evolve in the software industry?

- How can industry, government and academia cooperate to address the education challenges in the field of software engineering?

The forum will feature talks by:

- Aivo Adamson, CIO, Hansabank

- Marlon Dumas, Professor of Software Engineering, University of Tartu

- Jüri Kaljundi, Co-Founder, Nagi

Followed by an open panel discussion. The forum will be held in English.
